

MICRO-NEEDLING

Made popular by the likes of Kim Kardashian, Brangelina, Demi Moore & more....

As the MicroPen is applied to the skin, hundreds of superficial micro-channels are created every few seconds. Epidermal Collagen Induction Therapy (ECIT) can stimulate the skin's natural ability to heal itself. As a result, new collagen and elastin produce softer, firmer skin and can reduce the appearance of wrinkles, acne scars and textural issues.
