***Dermaplaning is a method of manual exfoliation by use of a special instrument. By removing dead skin cells, oil buildup, and bellows hair this treatment is a favorite among all.

***As the Eclipse MicroPen is applied to the skin, hundreds of superficial micro-channels are created every few seconds. Epidermal Collagen Induction Therapy (ECIT) can stimulate the skin's natural ability to heal itself. As a result, new collagen and elastin produce softer, firmer skin and can reduce the appearance of wrinkles, acne scars and textural issues.
